

SCC.241 Coursework

[Group ID]

[Group Member names, student numbers]

Note:

- Do not add/remove slides
- Do not change headers
- Use body part of each slide flexibly

A1- Reaction Time Experiment

- [Objective]
- Experiment design:
 - [description in bullet points]

A1 - Implementation

- [paste in relevant parts of source code, with clear annotation]

A1 - Demonstration

- [paste in video]

A2 – User Study Design: for Ethics Approval

- [Clear specification of the study planned, including:
 - Objective: what will you study and what is the goal
 - Task(s): what will participants be asked to do
 - Procedure: what happens from the time participants arrive until they leave
 - What data will be collected and how]

A2 – Demonstration of setup and tasks

- [insert video]

A2 - Results

- [report participant demographics, present study results, and discuss what you conclude from the data]

Video Presentation Notes

- For final submission, record a video of at least one you giving a live presentation of the slides. This can be a smartphone video, or a video recorded within powerpoint.
- The video presentation must be no longer 6 minutes:
 - Max. 2min for A1, and max. 4 min for A2
 - Focus your presentation time on design, demo and results; only briefly go over code
 - Don't waste time for introduction, motivation, summary or side issues
